No one likes it when the power goes out, especially the Water and Power department. Fortunately, due to Loveland’s extremely high rate of cutting the tree branches that cause the outage to the power distribution system between a three to four percent in fact—an outage is a very rare occurrence. But that doesn’t mean it can’t happen from a very robust, reliable system can experience occasional glitches and mean lights out for what could be 30 seconds, three minutes, or even a few hours. In the very rare case that the power goes out in your neighborhood, do you know what to do to keep your family comfortable and safe?

In one out of every two homes homeowners should immediately take, try to determine the cause of the outage. The outage could be your house only, due to a circuit, fuse out, or first check your electrical panel. If it’s clear the outage is more widespread—lights out for what could be 30 seconds, three minutes, or even a few hours. In the very rare case that the power goes out in your neighborhood, do you know what to do to keep your family comfortable and safe?

In our area to have on hand for a power outage:

• several working flashlights and extra batteries (flashlights are much safer than candles and can even be used as stoves)
• a battery-operated radio
• several working flashlights and extra batteries (flashlights are much safer than candles and can even be used as stoves)
• extra charged batteries?

• your appliances, your electric can go down. But you can also preserve food by keeping the refrigerator and freezer closed. These devices used, it’s always a good idea to have some bottled water for a variety of needs.
• a battery-powered camping lantern with extra batteries

• keep the refrigerator and freezer closed. These devices used, it’s always a good idea to have some bottled water for a variety of needs.
• a battery-powered camping lantern with extra batteries
• a battery-powered camping lantern with extra batteries
• a battery-powered camping lantern with extra batteries
