March 2011 Residential and Commercial Permits Issued

Permit	Classification	Work Description	Project Name	Parcel	Address	Contractor	Contractor Name	Primary Party	Primary Party Company	Valuation
BP-11-00184	Interior Alter - Retail	Remove existing tower in the center of the sales floor and relocate the security office to the front exterior wall and relocate the existing display cases around the tower as shown on the plans. The electrical currently used for the tower is being relocated to the new locations. The new load is about 6 amps greater than the existing load. The store uses about 385 amps of the existing 800 amp service. Two sprinkler heads will be capped and two will be relocated for equal coverage within the new room. There is an existing mechanical system that will be modified and rebalanced. The unit currently feeds the same space that the new office will occupy. A small split system for both heating and cooling will be added to the new security office for additional cooling due to the DVR's and LCD monitors.
