Walk for Water event raises awareness, funds to improve access to safe water

Every day, more than 775 million people across the globe—mostly women and children—spend hours of their day walking to get water to their homes, a task that is frequently strenuous and unsafe for consumption.

This reality spurred the founding of Water Mission (WaterMission.org), a nonprofit organization devoted to combating the global water crisis by raising awareness of the problem in countries that lack access to safe drinking water, and making donations that provide sustainable water treatment systems for struggling communities around the world.

To support the work of Water Mission, Hach (Hach.com), a Loveland-based company that designs and manufactures water quality analysis equipment, will host the 3rd Annual Hach Walk for Water from 9 a.m. to 1 p.m., May 7 at Loveland High School. The walk starts and ends at Loveland High School.

Participants can register online at WaterMission.org. Walkers will start with an empty bucket and walk halfway around Lake Loveland, approximately 2 miles, to an untreated water source. In their return trip to the high school, walkers will have the opportunity to pour their untreated water into a treatment system—the same type of system being donated to communities in developing countries and disaster areas.

Water Mission works to improve access to potable water around the world

Water Mission is a nonprofit engineering organization that designs, builds and donates water treatment systems for people in developing countries around the world. It has served 49 different countries on six different continents as well as 12 different countries in the African continent.

Faithful readers of this column know that I have a love affair with fishing. The annual Loveland Fishing Derby, held the last weekend of May, is an annual event that I look forward to every year.

I have been fishing for over 50 years and have spent many hours on the water, trying my hand at catching various species of fish. I enjoy the challenge of catching a big fish and the excitement of catching a small one.

The fishing derby is a great event that brings people together, whether they are fishing for fun or competitively. It is a great opportunity to bond with family and friends, or to simply enjoy the great outdoors.

The derby is open to people of all ages and skill levels, and is a great way to introduce children to the sport of fishing. It is also a great way to get people out of their cars and into the water, where they can enjoy the beauty of nature and the thrill of catching a fish.

The derby is held at Lake Loveland, a beautiful lake that is home to a variety of fish species. It is a challenging lake to fish, but it is also a great place to learn the basics of fishing.

The derby features a variety of prizes for catching the largest fish, as well as a variety of other prizes for catching fish of different species. There are also cash prizes for catching the largest fish of a specific species.

The fishing derby is held the last weekend of May, and is a great event for people of all ages and skill levels. It is a great way to enjoy the outdoors, meet new people, and have fun.

WaterMission works to improve access to potable water around the world

WaterMission is a nonprofit engineering organization that provides sustainable, safe water and sanitation solutions for communities in the developing world that lack treatment systems for communities in developing countries on five different continents with local staff in Latin America, Asia, Africa, and South America.

This reality spurred the founding of Water Mission (WaterMission.org), a nonprofit organization devoted to combating the global water crisis by raising awareness of the problem in countries that have access to potable water, but lack the resources and funding that donations can provide to; sustainable water treatment systems for struggling communities around the world.

To support the work of Water Mission, Hach (a Loveland-based company that designs and manufactures water quality analysis equipment, will host the 3rd Annual Hach Walk for Water from 9 a.m. to 1 p.m., May 1 at Loveland High School. Pictured above is Marilyn W. path 8. Proceeds from the event will go to help build water treatment systems for communities in the developing world that lack access to safe drinking water.

Walkers experience hiking water

The Walk, which will be 3-5 miles around Lake Loveland, attempts to simulate the journey of people around the world who must collect water in buckets every day. Walkers will start from an empty bucket and walk halfway around the lake, approximately 2 miles, to an untreated water source as if they were people in developing countries.

It has served 44 different countries on five different continents with local staff in Latin America, Asia, Africa, and South America.

The walk will allow first-hand the purification process taking place.

Save water and money this summer by getting an irrigation system inspection

To protect your hill driveway instead of your lawn and the bases of the homes that follow, the Loveland Water & Power Division, in partnership with the Colorado Agricultural Reference Conference is providing free irrigation system inspections to help reduce water waste and make sure your lawn is getting the water it needs.

A friendly and knowledgeable water conservation specialist will assess your sprinkler system’s water usage and efficiency, and diagnose problems, fix what they can, and offer suggestions on how to design landscapes for low and the lawn healthy and lush throughout the growing season. The Free Inspection has been helping area homeowners save money on water bills.

Inspectors last just about 90 minutes but can save you thousands of gallons of water each year.

It’s easy to schedule an appointment. Call 970-962-3000 or sign up at conservationcenter.org/sprinkler.

Pack your bags for LWP’s Passport to Power event

The annual Passport to Water and Power event invites Loveland residents to take a trip to their local municipal utility - Loveland Water and Power. The event runs from 9:30 a.m. on Thursday, June 15th and will last until 7 p.m. on Wonderland Park.

This year’s Passport event will feature 25 different education/displays and demonstrations and educational games. All activities are kid-friendly and include fun equipment and safer water usage and efficiency, and include equipment and safety stations designed to help children and parents learn about the watershed, water and many other topics.

Live music will be performed along the walk and activity/education stations designed to educate thoughtful global water challenges and the importance clear water plays in daily lives, which will also be on site.

Other booths will feature family-friendly activities such as face painting, basket decorating, and water-based educational games. All registered participants will receive a 3-shirt and bucket.

Several activity stations will be hosted by Hach Walk for Water sponsors including Colorado State University and Hydro Construction.

Participants can register to do the walk and donate at Hachforwater.org.

Water and Power generates a water quality Conscious Consumer Report (CCR) that is required by law to be distributed to customers in all states. LWP’s CCR is large part of the right-to-know provisions of the Water Drinking Water Act.

The CCR is also a great way to learn about the watershed, water treatment processes, land and water quality information, and more.

The CCR will be placed around town at City and public libraries, the library, and any other locations where customers can access it.

It also will be available on the City of Loveland’s website at cityofloveland.org/WaterQuality by June 30.

Customers who want a hardcopy of the report may call 970-962-3000.

For more information visit cityofloveland.org/Passport or call 962-3000.

Walk for Water event raises awareness, funds to improve access to safe water

Every day, more than 40% of the people across the globe—mostly women and children—save themselves the chore of finding homes to collect water—water that is frequently unclean and unsafe for consumption.

This reality spurred the founding of Water Mission (Wmwatermission.org), a nonprofit organization devoted to combating the global water crisis by raising awareness of the problem in countries that lack access to reliable water supplies. In the past, Water Mission has provided critical funding for donations that provide sustainable water treatment systems for struggling communities around the world.

To support the work of Water Mission, Hach (Hach.com), a Loveland-based company that designs and manufactures water quality analysis equipment, will host the 3rd Annual Hach Walk for Water from 9 a.m. to 1 p.m., May 7 at Loveland High School, to help build awareness for the global water crisis and needed funds to combat it.

Community members walked in pairs in front of a large photo of Water Mission's water treatment system, to witness first-hand the purification process taking place.

**Water Mission works to improve access to potable water around the world**

Water Mission is a nonprofit engineering organization that provides sustainable, safe, and affordable water and sanitation solutions for communities in developing countries. It has served 49 different countries on five different continents with local staff in Latin America, Africa and Southeast Asia.

Due to specially designed water treatment systems, it can treat 10 gallons per minute of raw seawater, fresh water sources such as lakes, streams, ponds or wells.

That translates to meeting the daily water needs (14 gallons per person per day) of between 150-200 people each time the system is in operation.

**Pack your bags for LWP’s Passport to Power event**

The annual Passport to Power event and public education station presented by Loveland-based Hydro Recycle and City of Loveland’s Water and Power will be held 12-2 p.m. on Thursday, June 9 and will feature 25 different education/demonstrations and educational displays.

All activities are kid-friendly and include interactive equipment and safety information stations designed to give children a hands-on view into how their municipal utility provides water and power to the community and offer suggestions on how to conserve both.

Participants can register to receive a Passport to Power passport and complete activities to earn stamping locations. Customers who want a copy of the CCR can receive a free stamping location. A limited number of passports will be available, so participants are encouraged to arrive early to receive stamps.

The report is designed to educate the public about the contents of the CCR. It will also be available on cityofloveland.org/CityofLoveland/WaterQuality by June 30.

Customers who want a hardcopy of the report may call 970-962-3000.

**Pack your bags for LWP’s Passport to Power event**

To support the work of Water Mission, Hach (Hach.com), a Loveland-based company that designs and manufactures water quality analysis equipment, will host the 3rd Annual Hach Walk for Water from 9 a.m. to 1 p.m., May 7 at Loveland High School, to help build awareness for the global water crisis and needed funds to combat it.

Community members walked in pairs in front of a large photo of Water Mission’s water treatment system, to witness first-hand the purification process taking place.

**Water Mission works to improve access to potable water around the world**

Water Mission is a nonprofit engineering organization that provides sustainable, safe, and affordable water and sanitation solutions for communities in developing countries. It has served 49 different countries on five different continents with local staff in Latin America, Africa and Southeast Asia.

Due to specially designed water treatment systems, it can treat 10 gallons per minute of raw seawater, fresh water sources such as lakes, streams, ponds or wells.

That translates to meeting the daily water needs (14 gallons per person per day) of between 150-200 people each time the system is in operation.
