The City of Loveland and the Loveland Area Chamber of Commerce are working together to develop a Mitigation Master Plan (MMP) and to create city-wide mitigation strategies designed to address identified hazards and put strategies in place for resilient vulnerabilities to those risks and the impact of future disasters.

No strategy is a panacea to disasters. In the last few years the City has experienced several large-scale, modestly sized disasters, notably the December 2013 storm which caused approximately $50 million in damages to private property and an estimated $500,000 in damage to public property.

The floods generated U.S. Highway 34 between Loveland and Estes Park in May 2013, one year later, which were designated as major disasters.

Other significant disasters in the area include the Tornado of 1986 which directly hit Fort Collins, a close neighbor to Loveland which caused the City approximately $2 million in losses, and the ice storm of 2013, which caused widespread power outages. The downtown "dreamers" no longer want to participate. For those interested in the project, there will be an informational meeting on September 10, 2016 at the Thomas M. McKee 4H Building, 5280 Arena Circle, Loveland - 10AM-5PM.

The City of Loveland is no stranger to large-scale disasters, most notably the 2013 Flood, which caused the City approximately $2 million in losses, and the ice storm of 2013, which caused widespread power outages.

The downtown "dreamers" no longer want to participate. For those interested in the project, there will be an informational meeting on September 10, 2016 at the Thomas M. McKee 4H Building, 5280 Arena Circle, Loveland.

Volunteers needed—Open Late Cornhole! Information Session—12th Grade—Part 2

8:30 AM—9:00 AM

The second session of information for the fall season. The first session is scheduled for September 9th and this one for September 10th. Please let us know if you can help out. The cost is $10 in door. For more information or to register please contact Tom Hacker at 962-2302 or Tom.Hacker@cityofloveland.org.

On Saturday, September 24th, 2016, from 9:30 AM-2:30 PM, the City of Loveland is hosting the Preparedness Expo, 2016. This year's theme is "Learn Life-Saving Tips!" Attendees will receive a variety of safety kits. The City will be providing tips on how to make your home safer and how to test your smoke alarm. Visit www.cityofloveland.org for more information.

That bill is not as simple as it sounds, city communications manager Andrew Andrews in late June.

The ballot measure requires the creation of a five-member downtown district board, which would be responsible for setting policies and rules, as well as raising and spending the tax dollars. The district board would include one member elected from each of the six city council districts, and one member who is not affiliated with a city council district.

The election is not a referendum on the trailhead, but rather a vote on whether to create the district. If the measure passes, the district board would then have to approve plans for specific projects, including street work, curbs and gutters, landscape and public art improvements, and amenities such as pocket parks and gathering spaces.

The downtown district would cover a large portion of the city, including the downtown business district, the Old Town area, and parts of the south and east sides of the city. The district would also cover the City's north and south boundaries.

The downtown district would be governed by a board of directors, who would be appointed by the City Council. The board would be responsible for setting policies and rules, as well as raising and spending the tax dollars. The board would include one member elected from each of the six city council districts, and one member who is not affiliated with a city council district.

The City of Loveland and the Loveland Downtown Development Authority are working together to develop a Mitigation Master Plan (MMP) to prepare for future natural disasters such as floods, fires, and severe storms. The MMP will identify areas of risk within the downtown district, prioritize actions that could be taken to mitigate the risks, and provide guidance for how residents can be better prepared in the future.

The City of Loveland is hosting a series of public meetings to discuss the MMP and gather input from residents. The meetings are scheduled for October 2023 at 6 p.m. at Loveland City Hall. Feedback from these meetings will be used to develop the MMP, which is expected to be complete in 2024.

To learn more about the MMP and to provide input, please visit LovelandMMP.org or contact the City's ADA Coordinator at 962-3319. The City of Loveland is committed to providing reasonable accommodations for citizens with disabilities under the Americans with Disabilities Act.
What goes down should stay down - how to properly dispose of food waste
divides or difficult to grind can cause a garbage disposal’s motor to jam, damage the grinding blades, or worsen, lead to a clogged drain. Although a garbage disposal is useful for getting rid of small amounts of food waste, residents should keep in mind that it is not interchangeable with a trash can. The majority of food waste should go in a trash can, or a trash bin. The majority of food waste should go in a trash can, or a trash bin.

Some food waste is hard for the garbage disposal to grind. Items such as fibrous or difficult to grind can be disposed of in the trash can. Here are a few helpful tips:

- Let's face it, we all have put food waste down the drain that isn’t meant to be there. It can cause clogs, drain jams, and jammed garbage disposals.
- There are a few helpful tips to help avoid expensive repairs and to help ensure food waste is disposed of properly.
- When a garbage disposal is plugged up, do not turn on the disposal; limit the amount of food disposed of at a time.
- Do not turn off the garbage disposal or water.
- When a garbage disposal is plugged up, do not turn on the disposal; limit the amount of food disposed of at a time.
- Do not turn off the garbage disposal or water.

Here are a few helpful tips to help avoid expensive repairs and to help ensure food waste is disposed of properly.

- Many food items such as fruit and vegetable peelings, coffee grounds, nuts, meat, seeds, animal bones and fruit pits should not be run down the drain. Food waste that is stringy, siny,
An inefficient sprinkler wastes water and your money!

What goes down should stay down - how to properly dispose of food waste

Food discarded. Don’t turn off the garbage disposal or water.

Here are a few helpful tips:

1. Some food waste is hard for the Wastewater Treatment Plant to handle.
2. Animal bones and fruit pits should not be put down the drain.
3. The grinders are sharp and can damage the garbage disposal.
4. Some food waste is hard for your pipes.
5. Hard foods, such as animal bones and fruit pits, cause a garbage disposal’s motor to jam, damage the grinding blades, or worse, lead to a clogged drain. Although a garbage disposal is useful for getting rid of small amounts of food waste, residents should keep in mind that it is not interchangeable with a trash can. The majority of food waste should go in a trash can, or better yet, a compost or worm bin.

For more information on proper disposal of food waste, and to help ensure food waste is disposed of properly, visit the Wastewater Treatment Plant’s education and outreach program, visit conservationcenter.org/sprinklers or call 960-3000.

Save Blue with a conservation mindset.

Platte River Power Authority is the not-for-profit wholesale electricity generation and transmission provider that delivers responsible, and competitively priced energy and services to Loveland Water and Power and its customers. The City of Loveland co-owns Platte River with the cities of Fort Collins and Longmont; and the Town of Estes Park.

Energy

Projected Sources of Energy in 2016 Average Wholesale Rates ($/kWh) 2015

- Solar: 18.5%
- Wind: 0.3%
- Biomass: 8.9%
- Natural Gas: 2.6%
- Nuclear: 0.7%
- Coal: 69.0%
- Purchases: 0.0%
- Other: 0.0%

Platte River has been a recipient of Larimer County’s Environmental Stewardship Award for its efforts in improving the environment for years. Platte River is the lowest cost wholesale electric energy provider located in Colorado, which helps ensure that the retail rates Loveland customers pay are among the lowest in the state.

For more information on Platte River Power Authority, visit platteriver.org.

Platte River Power Authority is an equal opportunity provider and employer that delivers responsible, and competitively priced energy and services to Loveland Water and Power.

Drive Electric Northern Colorado

Let’s Charge Our Community! Drive Electric Northern Colorado celebrates the new summer EV and plug-in hybrid (PHEV) event series sponsored by the City of Loveland and the local community. Volunteers will have the opportunity to get up close and personal to plug-in electric vehicles.

Platte River Power Authority will have a variety of electric vehicles on display to demonstrate the capabilities of the technology.
