

PATHWAYS

NATURAL RESOURCE CAREERS

EXPLORE THE ENVIRONMENT

Be a scientist and unravel questions about wildlife, forests, rivers, mountains, people's interactions with nature, and other aspects of our environment.

HELP PARKS AND PROTECTED AREAS

Work at a protected area like Rocky Mountain National Park and protect its visitors and environment as a ranger, visitor center attendant, environmental educator, event planner or graphic designer.

PROTECT THE ENVIRONMENT

Help be a steward of our environment working as a wildland firefighter, ecological restoration specialist, planner, trail crew member, maintenance person or environmental advocate.

PROVIDE MATERIALS WE ALL NEED

Help provide materials we need for everyday life as a geologist, hydrologist, forester, or mining technician.

"You can do a lot of different jobs in Natural Resources. Many organizations need business managers, accountants, human resources professionals, information technology professionals, grant writers, and more!"
