Smoke detector 101: install, test, clean

Smoke detectors have about a 10-year life. They should be replaced every 10 years. And of course, batteries have a much shorter life. Smoke detector 101: install, test, clean

Smoke detector tips:

- Install smoke detectors on every level of your home and inside or just outside each bedroom. For more information, call 962-2536.
- Check your smoke detector's test button.
- Check all smoke alarms, please contact the Loveland Fire Prevention Bureau at 962-2536.

Free pizza! That’s right, Free pizza. In an effort to get working smoke detectors in every Loveland home, staff members of the Loveland Fire Prevention Bureau are teaming up with pizza delivery drivers. If you own a home and your smoke detectors are functioning, you get free pizza. If your smoke detectors don’t work or you don’t have any, Fire Prevention Bureau staff will fix, replace or install a smoke detector at no cost. Smoke detectors are a critical element of the safety, says Dan Englehardt, fire inspector. When they are working, they can help keep them clean.

Using the trailer the help fire prevention staff is doing more than just hoping for a successful outcome to fire prevention efforts on the road. The Loveland Fire Safety Trailer takes fire safety education on the road. The Loveland Fire Safety Trailer is a mobile teaching tool used to promote fire safety education in our community.

Smoke detector 101:

- Install smoke detectors in your home and inside or just outside each bedroom.
- Test them monthly by pushing the test button.
- Replace the batteries twice each year.
- Smoke detectors have about a 10-year life.
