NEW SOLAR PROJECT TO SERVE LOVELAND ELECTRIC CUSTOMERS

Rawhide Prairie Solar is one of two noncarbon energy resources Platte River added to its portfolio this year. In June, the 225-megawatt Rawhide Prairie Solar project began commercial operation at the company’s Rawhide Energy Station in 2016 and is seeking to add another 150 megawatts of solar by 2023. The project is a 150-megawatt solar farm located in northern Colorado, and is expected to generate nearly 40% of Loveland's energy needs once fully operational.

Loveland’s natural areas offer lots of opportunities for residents to step out

Faul and Amy Worland used their slightly padded stroller with their baby, Annabelle, and their dog, Cooper, on their decision to move to Loveland during a late August walk on the newly opened Blue Sky Trail. "We’ve been eyeing the Blue Sky Trail for a while," Faul said, "and that’s a big reason we’re back.”

The Worlands have discovered what many Loveland residents already know: Rich opportunities for outdoor adventure lie right outside their back doors. "The development pace that has added thousands of acres, and that’s a big reason we’re back.”

We could gain over $220 billion in annual economic activity and create over 2.3 million jobs. What would a day be like without water? #ValueWater

1. River’s Edge Natural Area

This area is near south Loveland’s finest pond and nearly four miles of trails that wrap around them. Access to the trailhead is off of 15th Street and Front Street on the north, Taft Avenue on the west and Railroad Avenue on the south.

Maps and much, much more information on Loveland’s natural areas and trails are available online at www.cityofloveland.org/opendns. Take a walk on the wild side, or mild side.

For more information on Pulley Breadth, call 970.962.3196.

October 4-10 is Public Power Week

Commissioned by

It’s a celebration of what matters most to us: TOC, our community impact at Loveland Electric. Water, Power, we are communities powered.

Platte River’s new Rawhide Prairie Solar project is a large initiative for the company. Over 500 acres of land is dedicated to this solar farm, which is capable of generating approximately 22 megawatts of solar energy—enough electricity to power approximately 4,000 homes annually. The project is located on the Platte River near Wellington and is expected to begin commercial operation in late 2016. Platte River also receives energy from Rawhide Flats Solar, a 30-megawatt solar project built at the company’s Rawhide Energy Station in 2016 and is seeking to add another 150 megawatts of solar by 2023. The project is a 150-megawatt solar farm located in northern Colorado, and is expected to generate nearly 40% of Loveland’s energy needs once fully operational.

WE ARE CUSTOMER-FOCUSED. Because we’re not-for-profit, we’re not forced to compete with private companies just to keep your electric utility bills low. Our success is measured by how well we serve you, the services you requested. We’re developing new efficiency programs and expanding our ability to include Pulse Broadband.

WE EMBRACE SUSTAINABILITY. Public utility customers have no voice nearly 40% of their energy from renewable sources. We’re focused on providing great service and not just the bottom line.

NEW SOLAR PROJECT TO SERVE LOVELAND ELECTRIC CUSTOMERS

Electric utility customers in Loveland, Estes Park, Fort Collins and Longmont will soon receive noncarbon energy from Platte River Power Authority’s latest wind farm.

Platte River moves toward achieving the board-adopted Resource Diversification Policy goal of a 100% noncarbon energy mix by 2040.

Rawhide Prairie Solar is one of two noncarbon energy resources Platte River added to its portfolio this year. In June, the 225- megawatt Rawhide Prairie Solar project went online.

The project includes a 900-foot Tesla battery storage park, which will be used to test battery storage technology as Platte River transitions toward adhering to the board-adopted Renewable Energy Code. The project represents an investment of $300 million by customers.

Clearance Around Hydrants

CLEARANCE AROUND HYDRANTS:
• 15 feet distance in front of or behind a hydrant
• Shovel snow around the hydrant so it’s visible and accessible
• 3 feet from both sides of hydrant
• 18 inches of vertical clearance is needed from the base of the hydrant when parking.

Please call 970.962.3000 to report a lost or damaged fire hydrant.
